

TITLE PAGE

Project Title

Prepared by:

Submitted to the Faculty of the Department of Computer Studies in Cavite State University – Imus, Cavite

In partial Fulfilment of the Requirements for the Degree Bachelor of Science in Information Technology

Student Name 1

Student Name 2

Student Name 3

Date

CHAPTER 1 — INTRODUCTION

1. Introduction

Explain:

- What the system is
- Why it is needed
- Current problems

2. Project Context

Describe:

- Existing workflow
- Current issues
- Why automation is needed

Example:

- manual process
- delays
- human errors
- no real-time monitoring

3. Objectives of the Study

General Objective

Main goal of the system.

Specific Objectives

List features and goals.

4. Purpose and Description

Explain:

- Features
- Users
- Benefits
- Modules

Example sections:

- QR verification
- Notifications
- Admin dashboard
- Mobile app

5. Time and Place of the Study

Include:

- Timeline
- Location
- Respondents

6. Scope and Limitation

Scope

What the system CAN do.

Limitations

What the system CANNOT do.

7. Conceptual Framework

Use IPO (Input-Process-Output)

8. Definition of Terms

Define important technical terms.

Example:

- Frontend
- Backend
- Hosting
- Queue System
- QR Code

CHAPTER 2 — REVIEW OF RELATED LITERATURE

Your file contains:

- Related Literature
- Related Studies
- Research support

CHAPTER 3 — METHODOLOGY

Development Model

Example:

- Agile Prototyping
- waterfall model

Data Gathering

- Interview
- Survey
- Observation

System Design

- Use Case Diagram
- ERD
- Data Flow
- Architecture

Your file includes many diagrams:

- Use Case Diagram
 - ERD
 - System Architecture
 - Process Flow
-

CHAPTER 4 — SYSTEM DESIGN & IMPLEMENTATION

4.1 System Architecture

Explain frontend, backend, database, APIs, etc.

4.2 Features of the System

Explain modules and functionalities.

4.3 Technologies Used

Example:

- React
- Node.js
- NestJS
- MySQL
- Tailwind CSS

4.4 Screenshots and Description

Include:

- Login
- Dashboard
- Queue Processing
- Mobile App
- Reports

Each screenshot should have:

- Title
 - Screenshot
 - Short description
-

APPENDICES

Your uploaded file has excellent appendices:

- Gantt Chart
- Source Code (Sample Code or important module)
- Github Repository (public repository link and Screenshot)
- Diagram
- Evaluation Forms
